PROFESSIONAL SUMMARY

Solution Architect and AI/ML practitioner with **9+ years** delivering enterprise cybersecurity and technology solutions across the GCC. Combines hands-on expertise in machine learning, data science, and AI-powered automation with a strong foundation in digital transformation and cyber security frameworks. Focused on building intelligent, data-driven systems that improve security, efficiency, and business performance.

EDUCATION

MBA in Artificial Intelligence & Data Science (In Progress)

SRM University, Chennai

2026 – Present

M.Sc Cloud & Enterprise Computing

Nottingham Trent University, UK

2014 – 2016

B.Tech in Information Technology

Anna University, Chennai

2010 – 2014

PROFESSIONAL EXPERIENCE

Presales Consultant / Solution Architect

Starlink · Riyadh, KSA

Jan 2021 – Present

- Achieved **200% of targeted Gross Profit KPIs**; closed high-value mega deals with BSF, CST, and SEC after successful POC implementations.
- Awarded **Infoblox Expert Club Champion (2023)** and **Zscaler ACE (Oct 2024)** for outstanding technical and sales performance.
- Educated enterprise and C-level customers on emerging AI security risks (prompt injection, data leakage, model abuse) and delivered live demos on AI prompt protection and GenAI data-loss controls.
- Built an **AI-powered presales automation app** — auto-generating BOQs, RFP responses, and solution documentation — reducing turnaround time and improving proposal consistency.
- Developed an AI application to fine-tune a locally hosted LLM on organizational knowledge (**digital twin**), demonstrating secure on-premise AI deployment for data-sensitive KSA clients.
- Positioned AI/ML-driven security capabilities across the portfolio (behavioral threat detection, anomaly detection, UEBA, automated response), translating advanced analytics into clear business value.
- Delivered full presales lifecycle support: BOQs, RFP responses, POCs, technical demos, workshops, and C-level presentations; led strategic account mapping across the channel partner ecosystem.

AWS Bedrock

PROFESSIONAL EXPERIENCE (CONT.)

Professional Services Consultant

Starlink · Riyadh, KSA

Jan 2019 – Dec 2020

- Deployed enterprise solutions across Datacenter (Citrix ADC, SD-WAN), Endpoint (Trend Micro), Network Security (Infoblox, Forcepoint), and Database Security (IBM Guardium).
- Led **DDI migrations** (DNS/DHCP/IPAM) for banking and government clients, improving infrastructure reliability.

Cybersecurity Subject Matter Expert

Confidential Gov. Entity · Riyadh, KSA

Jan 2018 – Dec 2019

- Advised Cyber Security Directorate on multi-vendor architecture, vulnerability management, and risk registry maintenance.
- Managed SIEM monitoring and compliance reporting aligned to **NCA frameworks**.

Senior Penetration Tester

Confidential · Riyadh, KSA

May 2017 – Dec 2017

- Executed application, network, and infrastructure penetration testing using Burp Suite, IBM AppScan, and Core Impact.

Penetration Tester (Level 2)

Paladion · Mumbai, India

Feb 2016 – Apr 2017

- Led application security assessments for **ICICI Bank and SBI**; conducted configuration audits and web/mobile/network vulnerability management.

PROJECTS & ACHIEVEMENTS

Employee Recall — Custom AI Persona Model (LoRA + RAG)

Open Source · Published on GitHub & Hugging Face 2026

- Built and published an open-source persona-based AI framework combining **LoRA fine-tuning** (writing style and tone), **RAG** (grounded knowledge with citations), and system-prompt design (identity and behavior).
- Released full stack publicly — model weights, LoRA adapters, training dataset, and reproducible methodology — at github.com/kader-xai/EmployeeRecall and huggingface.co/kader-xai.

Data Science Roadmap — 81-Module Open-Source ML/AI Course

Open Source · MIT-Licensed · Published on GitHub 2025

- Co-AI authored **81 deep-dive Colab notebooks** spanning Python, data visualization, ML foundations, transformers (self-attention from scratch), diffusion, and time-series — including a guided dissection of **DeepSeek-V3** production inference (RMSNorm, RoPE, Multi-Latent Attention, Mixture-of-Experts).
- Covered practitioner skills typically missing from MOOCs — SQL, A/B testing, MLOps with FastAPI / Docker / MLflow, RAG with vector search, and LLM evaluation.

AddLM — Multiplication-Free Language Model

Open Source · Research Experiment 2026

- Designed and trained a transformer that removes all matrix multiplication — ternary $\{-1, 0, +1\}$ weights (BitNet-style) plus tropical (additive) attention — **matching the float-precision baseline at 25M parameters**. Reproducible Colab notebooks at github.com/kader-xai/addlm.

Technical Content & Community — YouTube Educator

@kader_mohideen · Self-Published · Educator & Speaker 2026 – Present

- Produce YouTube explainer videos on how transformer LLMs work (self-attention, multi-head attention, architecture internals) plus walkthroughs of open-source projects.

Kaggle — Machine Learning Practitioner

@kadmohideen9 · Competitions

- Compete in ML prediction challenges, applying feature engineering and gradient-boosting models — e.g. an XGBoost solution for the Titanic competition with engineered features (Title, FamilySize, group-survival rate, Deck) achieving **0.845 5-fold CV accuracy**.
